Nova

Aramco Consulting Championships 2025

Our Goal

Deliver a data driven strategy to establish a stable and scalable volunteer base for Namaa Foundation.

Presentation Roadmap

Current Base Assessment:

Quantifying the existing volunteer supply and its efficiency.

Value & Future Gap

Forecasting the future demand and calculating the supply gap by category.

Strategic Targeting

Recommending priority volunteer groups for recruitment, backed by national data.

Action Plan & Next Steps

Outlining the phased implementation of the new volunteer strategy.

Namaa Foundation

Client Overview

Who is Namaa?
A fictional Non Profit Healthcare organization.

Mission:
To be the reference partner in the Kingdom for improving the health and well being of underserved populations, fully aligned with Vision 2030 Quality of Life Program.

Operations:
Provides free and subsidized medical services, preventive care, and awareness campaigns, by qualified volunteers and modern solutions (telemedicine, mobile health apps).

Core Challenge & Our Project Focus

The Core Challenge:
How can Namaa transition from a successful, volunteer driven startup to a sustainable and scalable social impact leader in line with Vision 2030?

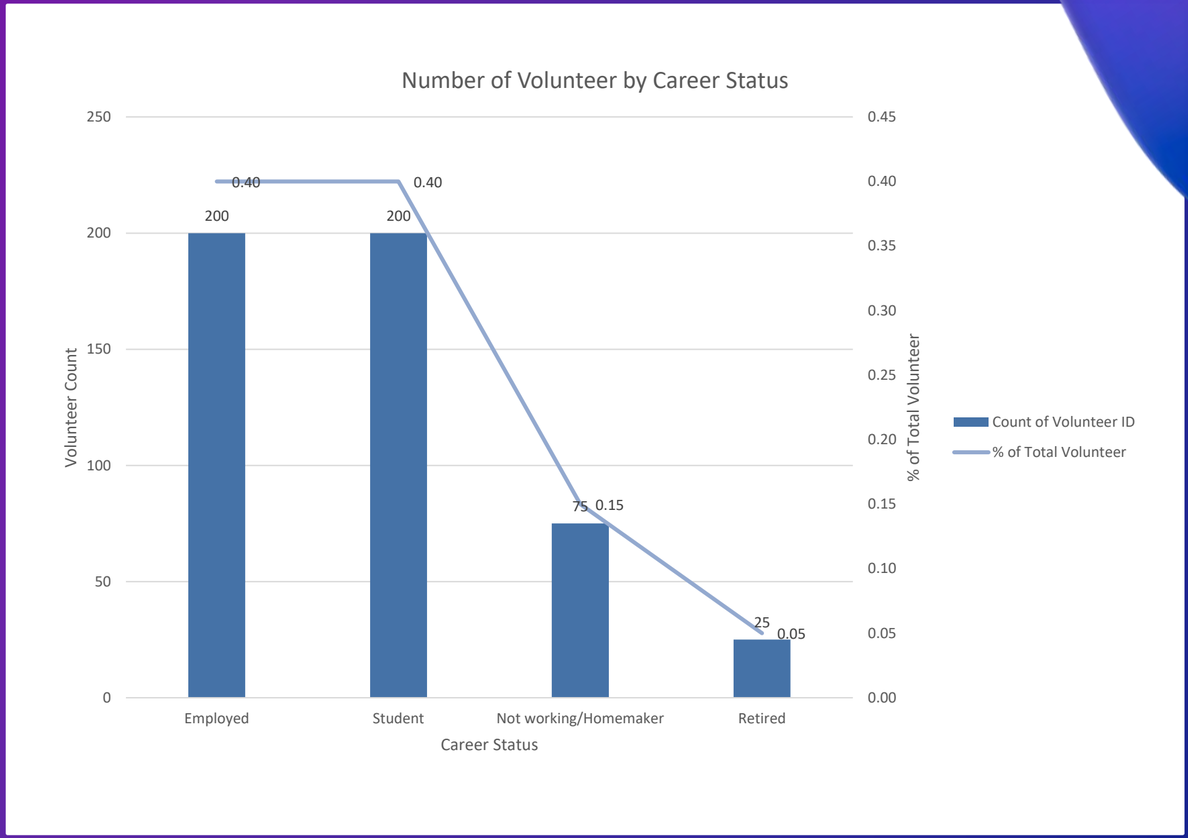

The Project Focus:
Design an action plan to recruit and retain the necessary qualified volunteers, focusing on optimizing resource allocation and meeting Namaa's future demand.

Current Size and Distribution of Namaa's Volunteer Base

Namaa's volunteer base is segmented by career status:

- 👨‍💼 Employed: 200 volunteers (40%)
- 🎓 Students: 200 volunteers (40%)
- 👵🏽 Retired: 25 volunteers (5%)
- 🚫 Unemployed: 75 volunteers (15%)

80% of the volunteers are either working people or students, and they are the majority of the sample. This indicates successful outreach with active and young populations. Retired volunteers also represent a considerable portion, reflecting potential deeper engagement.

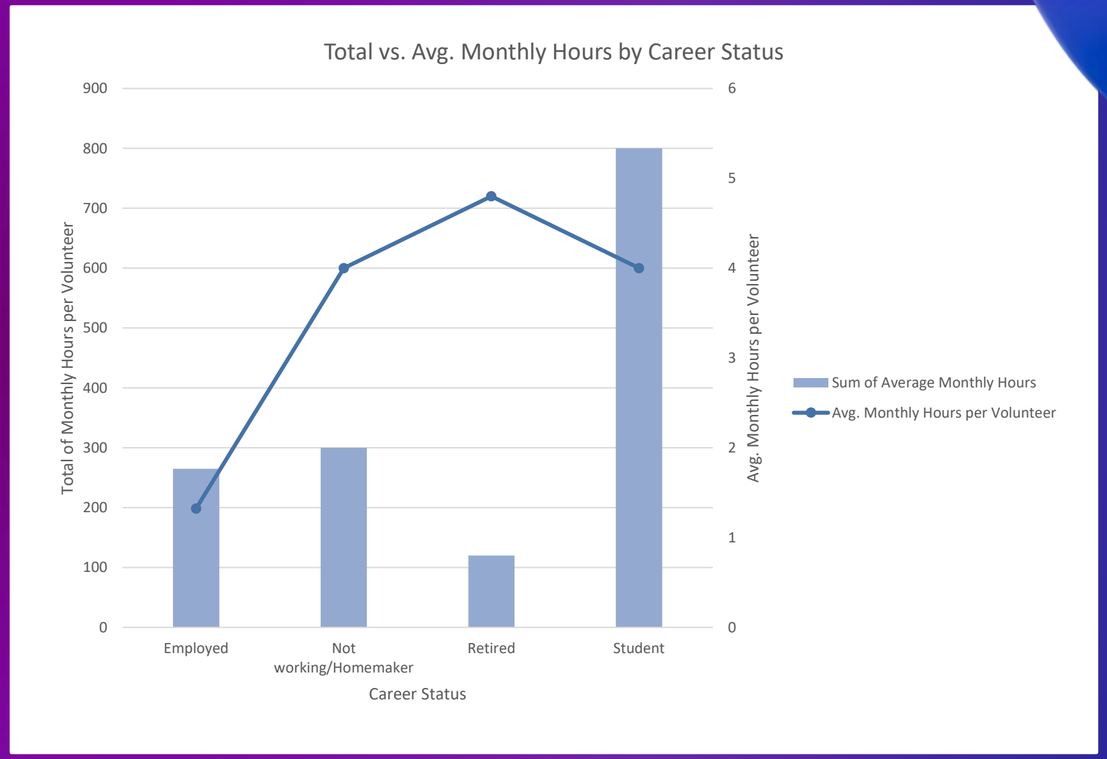

💡 Future industry segmentation (e.g., healthcare vs. non-healthcare) can potentially help to better target outreach and engagement efforts.

Volunteer Engagement - Total Hours by Career Status

Volunteer engagement varies across career segments based in availability and commitment.

	Total Hours	Average Monthly Hours
👨‍💼 **Employed**	265	1.325
🎓 **Students**	800	4
👵🏼 **Retired**	120	4.8
🚫 **Unemployed**	300	4

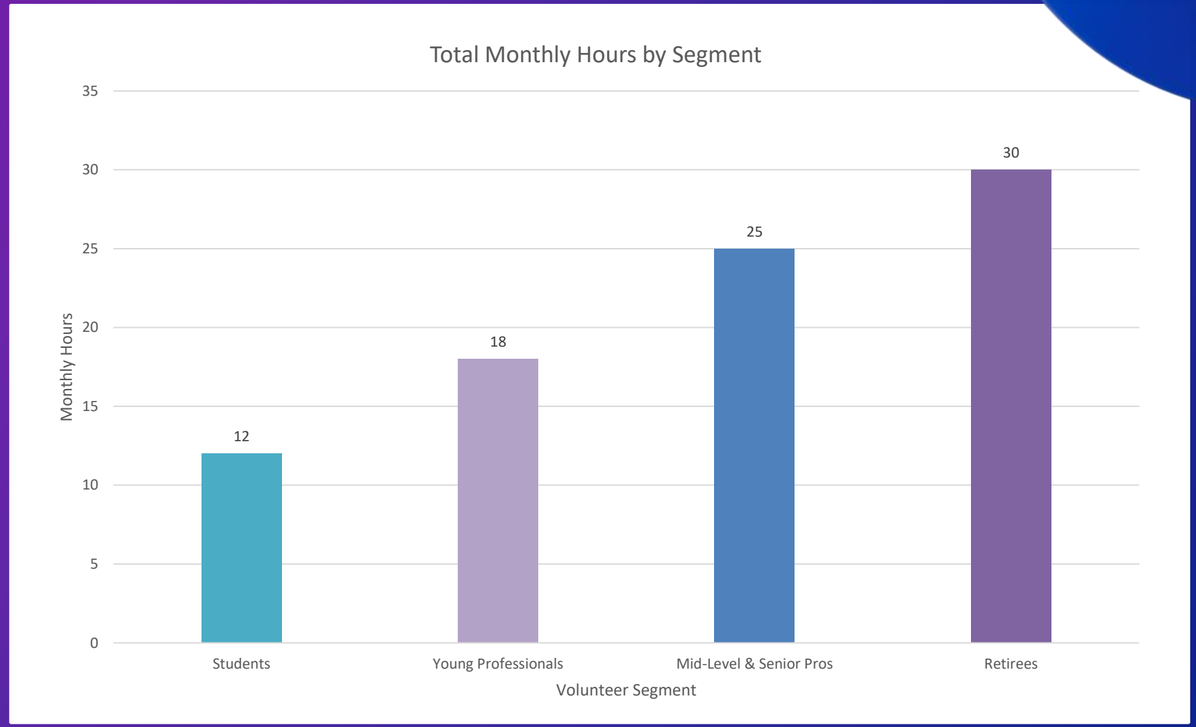

Both employed and student volunteers contribute significantly to the total hours (~200h each), indicating high involvement. Employed volunteers have high commitment with restricted availability, and students contribute dynamically because of flexible timetables. Retired volunteers have high average monthly hours, indicating high regular commitment.

Volunteer productivity & value

Throughout the analysis, we discovered noticeable differences in volunteer productivity

volunteers who received experience contributed 20% more productive hours on average compared to those without tr

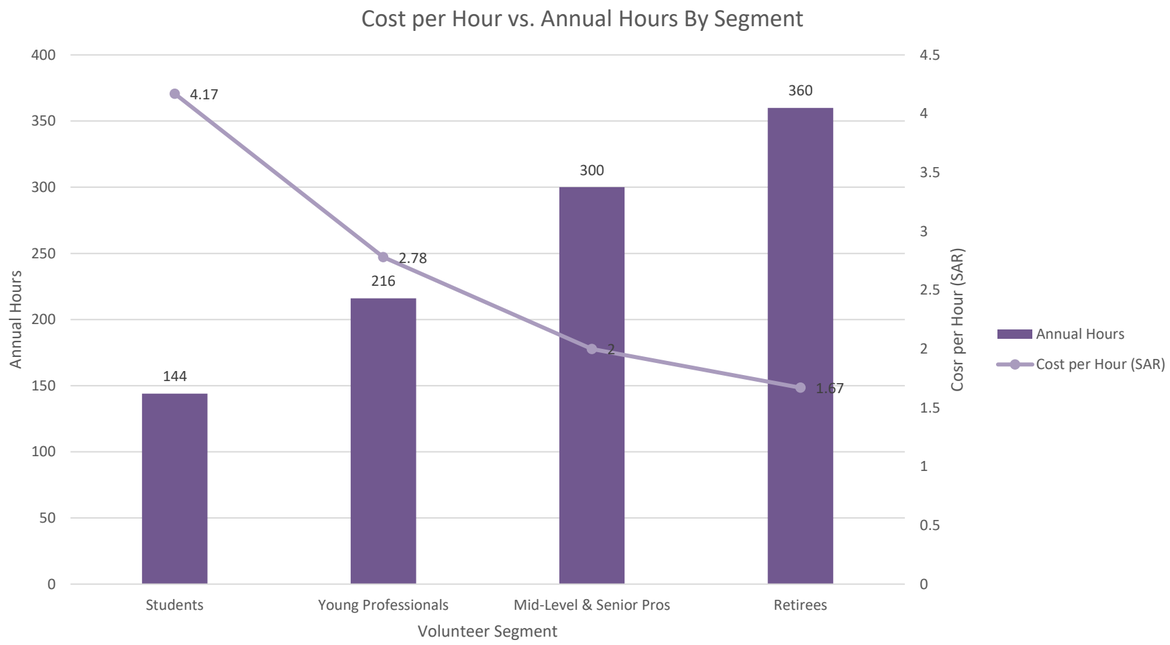

additionally, volunteers with 3-5 years of experience showed the highest consistency and satisfaction levels.

Cost of recruitment

We also found out that
retirees cost less than other segments
and they have less value to Namaa.

On the other side students have
most of the Valus with higher recruitment
Cost.

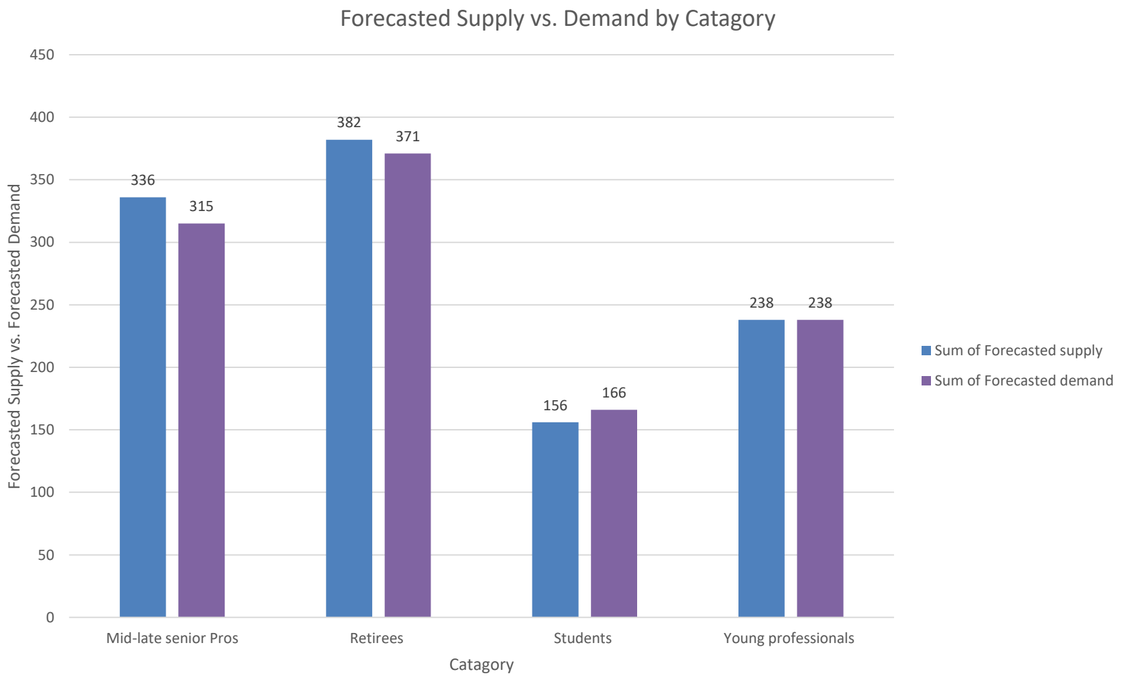

Forecasted Volunteers Hours Demand

The analysis indicates that volunteer hour demand is expected to increase across all categories.
Students shows the highest growth with 15%, while retirees 3% .
This proves that overall volunteer activity is raising steadily with students driving the most growth due to their larger base

Gap	Forecasted supply	Efficiency %	Forecasted demands	Growth%	Number of volunteers	Current hours in years	Category
10	156	8%	166	15%	200	144	**Students**
0	238	10%	238	10%	200	216	**Young professionals**
-21	336	12%	315	5%	75	300	**Mid to late career**
-11	382	6%	371	3%	25	360	**Retirees**

Supply Demand gap

Comparing supply and demand shows that the largest gap appears in student segment (+10 hours) while the smallest is mid to late career (-21) meaning that the volunteer hours have exceeded the required amount, resulting in a surplus.

What are the pros and cons of prioritizing and targeting each segmant?

4A

Volunteer segment	%count of volunteers	Avg of monthly volunteering hours	Cost of acquisition per volunteer	Pros	Cons
Students	40% (the highest)	4.0	University partnership (250SAR)	High commitment rate; Highest total hours contributed (800 hours); Natural fit for communications/event roles.	Highest acquisition cost (SAR 250); Seasonal availability (academic breaks).
Employed	40% (the highest)	1.3	Online marketing(100SAR	Lowest acquisition cost; Largest potential pool for professional skills.	Lowest commitment rate (1.3 hours); Highest Cost Per Hour (least efficient); Significant time constraints.
Not working - homemaker	15%	4.0	In-person outreach (200 SAR)	High commitment rate; Consistent, flexible availability (daytime roles).	Smaller total pool size; Medium acquisition cost.
retired	5% (the lowest)	4.8	In-person outreach (200 SAR)	Highest commitment rate (4.8 hours); Offers extensive life/professional experience; Most cost-efficient segment.	Smallest total pool size; Medium acquisition cost.

Which volunteer segments should Namaa prioritize for recruitment?

4B

Namaa should prioritise the two high commitment volunteer segments for count of volunteers and stability.

1-Major priority on students:

- Continue to prioritize them for the high volume recruitment.
- Average monthly hours (4 hours) results in a strong contribution rate.

2-Retired & not working (Homemaker):

- The most stable and cost efficient
  - Have the highest average monthly hours (4.0-4.8 hours).
  - Available all time, and can complete the work faster and more efficient due to their experience.

How do national volunteering trends support our recommendations?

4C

Saudi vision 2030 strongly support and focus on volunteering.

1-Motivating students to volunteer:
The Ministry of Education added the requirement of volunteering at least 40 hours to graduate from high school.
Giving copouns to motivaite them to work more.

2- National surveys identify time as the most prominent barrier to volunteering, this fact validates the extremely low average monthly hours (1.3 hour) observed in Namaa's employed segment.

Thank you
